## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Minami et al.

Regarding claim 1, Minami et al discloses on figure 15 a semiconductor device comprising a plurality of regions representing output bits 36; and a dummy pattern 37 having the same shape as the output bits formed to be adjacent to the end portions of output bit group.

Regarding claim 2, Minami et al discloses on figure 15 a semiconductor device for a driver comprising a plurality of output one bits 36 constituting an output bit group;

and a dummy pattern 37 having the same shape as the output bits formed to be adjacent to the end portion of the output bit group.

Regarding claims 3-6, Minami et al discloses on figure 15 all the structures set forth in the claimed invention.

Regarding claim 7, Minami et al discloses on figure 15 a pattern layout method of a semiconductor device arranged with plural output bits comprising the step of forming a dummy pattern 37 having the same shape as the output bits to be adjacent to an end portion of an output bit group.

Regarding claim 8, Minami et al discloses on figure 15 a pattern layout method of a semiconductor device arranged with plural output one bits and constituting an output bit group comprising the step of forming a dummy pattern 37 having the same shape as the output bits to be adjacent to an end portion of an output bit group.

Regarding claims 9-12, Minami et al discloses on figure 15 all steps of the method set forth in the claimed invention.

### ***Response to Arguments***

Applicant's arguments filed on 6/27/2003 have been fully considered but they are not persuasive.

Applicant argues in Minami wiring 36 is not equivalent to an output bit as recited in claim 1 and that dummy pattern 37 has a different shape than wiring 36. However, the output bits are simply wirings connected to a source in a memory cell. So-called output bits in the claimed invention are not specifically defined in such a way it

Art Unit: 2815

structurally distinguishes from wiring 36 of Minami therein. Further, the dummy patterns 37 are clearly having the same shape as that of the output bits to be adjacent to the end portion of an output bit group 36. As such, Minami reads on the claimed invention.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
